BERGMANN Roll-Packer

Roll-Packer RPM 7700 Mobile Jumbo

Mobile compaction in several open containers

- Mobile compaction and compaction of large quantities of garbage and waste in several open containers
- Crushing and compaction in layers by a rolling movement of a specially equipped compaction drum
- compaction directly in open containers to a length of 7 m
- Continuous filling
- With container moving device for container weights up to 10 tonnes

Working method

1. The Mobile Jumbo at a recycling plant, a typical location of use. Here, all containers can be compacted with just one Mobile Jumbo
2. The specially equipped compaction drum breaks, tears and compacts the waste. It can also be filled continuously during the compaction process.
3. Once the container is filled, it is pulled by means of the moving device from the container place without using a truck and made ready for transport.
4. Now an empty container is taken from the depot and put back into the row.

Mobile compaction in several open containers

BERGMANN Roll-Packer

Roll-Packer RPM 7700 Mobile Jumbo

Product description

The BERGMANN Mobile Jumbo is a mobile compaction device which makes it possible to consolidate large quantities of bulky waste or re-usable material in several open containers and, thus, minimise the number of disposal journeys.

The Mobile Jumbo is the original, developed by BERGMANN, with the highest reliability and quality and can be installed at as many open containers as desired. More than 10 years of experience set standards in longevity and ease of maintenance.

Through the continuous rolling movement of the heavy compaction drum, the thrown in material is constantly broken up, torn up and compacted in such a way that a compaction of 3:1 or more is possible. Up to 60 % are saved in costs, which lead to a rapid amortisation.

The new container moving device of the RPM 7700 Mobile Jumbo also offers the advantage that an extra lorry does not need to be specially ordered to replace a full container, but rather can be dealt with immediately. Your costs are therefore reduced and additional container places are minimised.

At the same time, your flexibility is increased by the container moving device, because you can also work at times when lorries are not available (weekends).

Mobile compaction in several open containers

BERGMANN Roll-Packer

Roll-Packer RPM 7700 Mobile Jumbo

Economic efficiency

- Application of as many open containers as desired
- Independence regarding the number of containers locally, as well as their location
- Maximal flexibility via its own drive
- Minimisation of the quantity of waste to a fraction of the original volume
- Increased durability and availability of the containers
- Investment in only one machine
- Optimal utilisation of the container area
- Applicable without structural changes
- Shortest amortisation period. Without the Mobile Jumbo, the contents in the container consist of 60% air and only 40% waste. With the Mobile Jumbo, you reverse the ratio! Since in the optimal case, thus, only the costs accumulate for every 3rd emptying trip, the savings potential of the Mobile Jumbo lies up to 60%
- The previous discharge system remains
- Pre-crushing, cutting, tearing or folding of large volume filler is no longer necessary
- Large quantities of waste of also bulky waste filler are surmounted problem-free
- The Mobile Jumbo is particularly suitable for compressing pallets, bulky garbage, cable drums, voluminous and bulky wastes and re-usable material of all types
- Continuous filling of the container also during the compaction process
- Comfortable and simple operation
- Low-maintenance through hydraulic drive
- Developed and produced for application in continuous operation
- Worldwide technological experience for over 20 years with the highest quality standard
- Well-developed design and technology on the basis of many years of experience
- High, fast and available for spare parts for many years, guaranteed for 15 years
- Worldwide service network

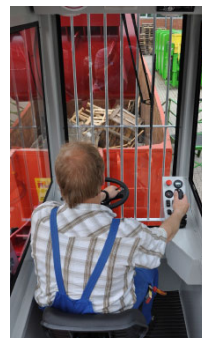

Mobile compaction in several open containers

BERGMANN Roll-Packer

Roll-Packer RPM 7700 Mobile Jumbo

Technical characteristics

- Due to the ongoing movement of the drum with over 1.5 tonnes of drum weight in combination with a high compaction force, a constant breaking and tearing of the material structure is achieved.
- Removal weights of up to 10 tons of compacted pallets in a 35m³ container
- Suitable for containers with a height of up to 3,100 mm
- Hydraulic drive guarantees a high machine availability with minimal maintenance
- High processing capacity
- Hydraulic drum lift
- Efficient dieses engine with low fuel consumption (approx. 4 litre/ hour)
- Control panel with drum advance/return for manual influence of the drum travel
- Compaction drum equipped with high wear-resistant teeth
- Service-friendly by an easily accessible engine and hydraulic parts
- CE certified
- Completely Made in Germany by qualified and experienced staff

BERGMANN Roll-Packer

Roll-Packer RPM 7700 Mobile Jumbo

Equipment

Standard equipment

- Increased driver's cab (~4,000 mm) for view of the container
- Fully glazed driver's cab for excellent visibility during driving and steering manoeuvres
- Generously sized maintenance doors make for easy access to all important technical elements
- Ergonomically designed and easy-care, washable seat
- Safety glazing and protective grating for windscreen
- Windshield wiper in front
- Working hour counter
- Water-cooled, 4-cycle diesel engine
- Equipped for a container of heights of up to 2,700 mm (standard)
- Safety rail and handrail for cabin access
- Automatic or manual compaction mode
- Variable drive control via joystick
- Oil level monitoring
- Steering with traditional steering wheel
- Indicating lamps of the operating status on the instrument panel
- And many more!

Accessories

- Equipment for containers with heights of up to 3,100 mm
- Container moving device for containers of up to 10 tons.
- Special roller assembly depending upon type of waste
- Multi-circuit for 3 defined roller lengths
- Radio system
- Engine-assisted heating system, also optionally steered by a time clock
- Hydraulic oil heating, also optionally steered by a time clock
- Air conditioning
- Auxiliary headlight
- Auxiliary heating system
- Flashing light during machine operation
- Castors with profiled tires
- Compaction mode via electrical connection
- ... ask for special versions

Roll-Packer RPM 7700 Mobile Jumbo

Locations

Types of waste:

- Compaction of pallets and comparable wood products
- Voluminous and bulky wastes of all types (garden wastes, bulky garbage, residual waste)
- Re-usable material of all types (pasteboard, foil, glass, plastics, light metal parts)

Locations:

- Recycling plants
- Container places
- Industrial companies
- Warehouses
- Food distribution centers
- Waste sorting plants
- Reloading stations
- Recycling companies
- Woodworking industry
